Solstys

A collection of handknotted light

Light sculpts fascinating silhouettes and evokes forms all around us. It reveals colours and textures that make objects one might usually overlook infinitely beautiful. The expressive hand of time leaves unpredictable traces everywhere and works its magic creating a rich patina.

Rugs as canvases, Photography as inspiration

Through a camera's eye, **Solstys** captures the poetic artistry of nature, its authenticity and wildness. It translates the dialogue of the elements into unique textural canvases which are brought to life by the highly-skilled hands of tibetan weavers. Two arts combined to create a new medium illustrating the magic wonder and imperfect perfection that is in nature. **Solstys** rugs portray the exquisite delicacy of simple things and reflect their essence of beauty on our floor. Rugs that explore the elegance of rust slowly seeping a landscape, of shadows whispering on a wall ; no discernible form, but room for a personal reading that embraces the world across cultures and time... fragments of perpetual motion. In a busy world, **Solstys** brings a breath of nature to interior spaces, infusing them with something that is at once luxurious but understated, collectible but accessible, familiar but not immediately recognizable.

Solstys ATELIER significantly enlarges the Portfolio offering a wide range of design options and motifs from traditional to contemporary. A comprehensive archive, inspiring design source for all kinds of projects.

Solstys COLLECTION is the culmination of a long experience of collaboration with some of the world's most celebrated interior designers, provided in a variety of qualities and materials with extensive custom capabilities.

PHOTOGRAPHIE AS INSPIRATION
